 - Bond tenaciously to almost any surface including steel, aluminum, bronze and most metals. Also rubber, fiberglass, concrete and most non-metallic surfaces.
 - Excellent vibration and impact resistance
 - Outstanding corrosion and chemical resistance
 - Superb flexibility and elasticity under extreme conditions
 - Heat resistant
 - High compressive strength

With Belzona You Can:

REBUILD

Scored shafts and hydraulic rams, worn keyways, loose spline and bearing housings, stripped threads, holed or crazed casings

PROTECT

Against erosion/corrosion to various equipment including pumps, valves, heat exchangers and production vessels

REPAIR

Rubber components, damaged hose and cable coverings, linings, conveyor system belt fasteners and torn conveyor belts

SEAL

Leaks in all types of vessels including tanks, pipes and flanges

Pump Systems, LLC

Pump Systems is an internationally recognized leader in the pump industry.

Since 1973....we have provided years of excellence in the Marine and Offshore Industries. We supply pumps for all types of Marine Vessels, On and Offshore Oil Production, Drilling Contractors, Service Companies, and Industrial Applications.

All of our Pump Packages are backed with the Pump Systems Quality Assurance Plan. This plan includes engineering assistance when sizing and selecting pumps and equipment for custom component fabrication for your individual projects.

Our service team, staffed by trained specialists is fast and effective. A complete inventory of parts assures rapid replacement and repair.

Our customers know that pumps are our only business, and our only business is to service our customers.
